PROFESSIONAL SUMMARY

AI & Data Science Engineering specializing in end-to-end ML pipelines — from data preprocessing and feature engineering through model deployment. Built and shipped multiple production-style ML web applications (Streamlit/Flask) across various domains including healthcare risk modeling, agriculture, and computer vision.

TECHNICAL SKILLS

- **Languages** : Python, SQL , C++
- **ML / DL Frameworks** : TensorFlow/Keras, Random Forest, CNN, OpenCV, Joblib, YOLO, Hugging Face, GPT/BERT
- **Data & Analysis** : EDA, Deployment, SKLearn, MySQL, Evaluation
- **Visualisation** : NumPy, Pandas, Feature Engineering, Power BI, Matplotlib, Seaborn
- **Tools & Platforms** : Jupyter Notebook, Git/GitHub, VS Code, Google colab , Streamlit, Flask , Netlify

PROJECTS

SnapClass – Face Recognition Attendance System

[Repo](#) | [Live](#)

Python, OpenCV, Scikit-learn, NumPy, KNN, Flask

- Engineered an AI-powered automated attendance system using facial recognition; implemented a K-Nearest Neighbours (KNN) classifier for real-time face identification.
- Achieved a 90% reduction in manual attendance errors, improving institutional operational efficiency.

CropCycle Soil-Aware Planning

[Repo](#) | [Live](#)

Python, Scikit-learn, Random Forest, XGBoost, Matplotlib, Streamlit

- Enter your last crop or raw NPK/soil readings, and it recommends the next planting for stronger yield and healthier soil.
- Built an interactive Streamlit web application that predicts crop suitability, estimated yield, water requirements, soil health score, and provides next-season crop recommendations to support sustainable farming practices.

Cardio-Sense-AI - Cardiovascular Risk Screening

[Repo](#) | [Live](#)

python, Random Forest, SVM, Streamlit, SKLearn

- Built an ML screening tool estimating cardiovascular disease risk from lifestyle and health indicators, trained on BRFSS health-survey data.
- Used Random Forest for feature selection and a threshold-tuned, isotonic-calibrated SVM classifier, achieving ROC-AUC of 0.76.

WORK EXPERIENCE

NSIC, Chennai

Data Science Intern

Jan 2025 – Feb 2025

- Executed end-to-end data workflows — preprocessing, exploratory analysis, and ML model implementation — on real-world industry datasets.
- Collaborated with senior data scientists to adopt best practices in model evaluation, validation, and reporting, accelerating learning of production-grade pipelines.

InternPe

Jun 2025 – Jul 2025

Python Programming Intern

- Developed and optimised 15+ Python programs, strengthening proficiency in data structures, algorithms, functions, file handling.
- Delivered assigned mini-projects ahead of schedule, demonstrating strong time management and problem-solving skills.

EDUCATION

B.Tech in Artificial Intelligence & Data Science - CGPA 8.45

Sep 2023 – Present

Dhaanish Ahmed College of Engineering, Chennai

HSC – Computer Science Stream - 80%

Jun 2022 – Apr 2023

St.Mary's Matric. Hr.Sec. School, Chennai

CERTIFICATIONS & ACHIEVEMENTS

- **NPTEL**: Joy of Learning Python · Big Data Computing · Machine Learning
- **TCS iON**: Career Edge – Young Professional Program
- **Simplilearn**: NumPy, Power BI
- **JLPT** (Japanese Language Proficiency) : N5
- **Languages**: English, Japanese
- **Competitive Coding**: 150+ problems solved across HackerRank, LeetCode, and CodeChef ·
- **Prize**: Best Student Award, PPT, Events.
